Can I Get a Membership Extension for the re-origin Program?

At this time, we're not able to offer membership extensions for the re-origin program.

We completely understand that life circumstances can change—whether due to health, time constraints, or unexpected events—and it's natural to want more flexibility. However, our current subscription structure does not support extending access beyond your active membership period.

How re-origin Membership Works

The re-origin program is a self-paced neuroplasticity and nervous system retraining program, designed to support individuals experiencing chronic symptoms such as pain, fatigue, anxiety, and brain fog.

Your membership provides:

- full access to all re-origin program content
- the ability to move through the material at your own pace
- ongoing access for as long as your subscription remains active

Because access is tied directly to your subscription, we're not able to manually extend memberships.

Built for Flexibility and Real Life

One of the key principles of the re-origin program is flexibility.

You can:

- go through the program at your own pace

- revisit lessons and practices as often as needed
- take breaks and return when you’re ready
- adapt the work to your energy levels and lifestyle

There is no pressure to complete the program within a fixed timeframe, which allows you to engage in a way that supports your nervous system and overall wellbeing.

What If You Need More Time With the Program?

If you’d like more time with the re-origin program, you can simply continue your membership.

This allows you to:

- maintain uninterrupted access to all content
- deepen your neuroplasticity and brain retraining practice
- revisit key tools for nervous system regulation
- continue progressing at your own pace

Many members choose to stay longer to fully integrate the work and support long-term symptom improvement.

A Supportive Approach to Healing

We recognise that healing from chronic symptoms and nervous system dysregulation is not always linear. While we’re not able to offer membership extensions, the re-origin program is designed to support you with flexibility, compassion, and ongoing access through your subscription.

If you have specific circumstances or need guidance, our team is always here to support you.

Summary

Membership extensions are not currently available. However, the re-origin program is designed to be flexible, self-paced, and ongoing allowing you to continue your healing journey through your active membership.

Can I pause my membership?

We can not pause active memberships, your annual subscription will continue to run until you cancel it.

Will I lose access if my membership ends?

Yes, once your membership ends, access to the program content will no longer be available. You can rejoin at any time to regain access and continue your progress.
